

EMERGENCY PARTS & SERVICE

TURNKEY SOLUTIONS INCLUDE:

- 24/7/365 Emergency Response
- Nuclear & Non-Nuclear Power Generation Support
- Turn-Key Bus Duct Installation, Replacement, Refurbishment, Inspection, Cryogenic Cleaning & Repair
- Turn-Key GCU, AUX, ESS, GCB & CT Installation & Transformer Change-Outs
- Offline Robotic Video & Borescope Inspection for IPB
- Replacement & Re-manufactured Parts - Any OEM
- Generator Output Bushing CT Replacement
- Generator Breaker Turnkey Solutions
- Total Non-Seg Refurbishment
- IPB Seal-Off Bushings Remove/Install (Aluminum & Copper)
- Complete Reverse Engineering Solutions
- Onsite Silver Plating
- & More

EMERGENCY PARTS & SERVICE

24/7/365 Support for Your Isophase,
Non-Segregated, Segregated, &
Cable Bus Duct Systems.

EMERGENCY PARTS & SERVICE

24/7/365 Support for Your Isophase, Non-Segregated,
Segregated, & Cable Bus Duct Systems.

SHORTEN UNPLANNED OUTAGE TIME WITH EBI'S EMERGENCY PARTS & SERVICES

Do you know who to call when an emergent or unexpected failure occurs on your plant's medium or high voltage electrical equipment from the point of generation to the grid? Time is money when an emergency occurs and your plant is offline. EBI's rapid response team specializes in emergency repair services and has been pioneering innovative emergency services and solutions for the power generation industry since 1974. EBI installs, inspects, modifies, and performs retrofits and repairs on all types and brands of bus duct, including isophase, non-seg, seg, and cable bus systems. Considering most failures occur after the bus duct system's warranty expires, we provide project management, reverse engineering emergency-replacement fabrication, and technical consulting services; saving you time and money.

Call us first if you experience a bus duct malfunction or failure. Our dedicated rapid response team can mobilize quickly – in most cases within 12 hours – with a complete fleet of modern construction equipment, certified field technicians, project managers, fabricators and technical experts trained in troubleshooting and improvement of both current and obsolete product lines from all major OEMs.

EMERGENCY SERVICES

- 24/7/365 Emergency Response
- Nuclear & Non-Nuclear Power Generation Support
- Turn-Key Bus Duct Installation, Replacement, Refurbishment, Inspection, Cryogenic Cleaning & Repair
- Turn-Key GSU, AUX, ESS, GCB & CT Installation & Transformer Change-Outs
- Offline Robotic Video& Borescope Inspection for IPB
- Replacement & Re-manufactured Parts - Any OEM
- Generator Output Bushing CT Replacement
- Generator Breaker Turnkey Solutions
- Total Non-Seg Refurbishment
- IPB Seal-Off Bushings Remove/Install (Aluminum & Copper)
- Complete Reverse Engineering Solutions
- Onsite Silver Plating
- & More

EMERGENCY PARTS & FABRICATION

- Complete Mobile Fabrication Shop (www.electricalbuilders.com/r3)
- IPB Enclosure & Conductor Parts
- Design & Reverse Engineering/Fabrication
- Terminations (Flexible Braided Assemblies & Laminated Flexes)
- Wall & Ancillary Equipment Bushing Seal-Off Replacements
- Obsolete Parts (Bushings, Insulators, Etc.)
- Insulators & Support Assemblies
- Bellows (Rubber or Aluminum)
- Refurbishment of Existing Parts
- IPB Enclosure Expansion Joints
- Welded Conductor Shunt / Expansion Assemblies
- Replacement Isolation GPO3 / G10 & Hardware
- Gen & GSU LV Bushing/Neutral Boxes & Isolation
- Generator (GSU Transformer) LB Bushing Cabinets
- Proprietary Welded Inspection Windows/ Bus Insulator Supports
- Gasket Material
- Adapter Plates
- Shorting Plate Assemblies
- Bonding Bars
- Silver Plated Conductor Adapters
- 3D Modeling Capabilities
- & More
